Phone: 316.554.2331; Fax: 316.554.2342***

Registration Deadline: June 6th!

Description:

Regardless of what subject you teach, computer science is foundational knowledge for all students in the 21st century. Incorporating it in your classroom will give your students a huge leg up. Besides, this is a subject the kids love learning. This workshop will include an intro to computer science, pedagogy, overview of the online curriculum, teacher dashboard, and strategies for teaching “unplugged” classroom activities.

Over 10,000 teachers have participated in a workshop and the majority say it’s the best PD they’ve ever attended.

You’ll also receive (at no cost to you):

- * Printed curriculum guide
- * Classroom supplies for the unplugged lessons
- * Fun Code.org swag

Presenter: **Jessica Asbury**

Jessica Asbury is an elementary STEM teacher for Piper Schools in Kansas City, KS. Along with teaching beginning technology skills to kindergarten through 5th grades, she also works closely with classroom teachers as they integrate 21st Century Skills into their classrooms. She has over 10 years of elementary classroom teaching experience and holds a master’s degree in gifted education. She also organizes an after school program that teaches advanced coding skills through game based exploration. Her passion for coding comes from the simple and natural way it integrates Computer Science with problem solving, creativity and persistence.

Date & Time: **Wednesday, June 13, 2018**

8:30 A.M. to 3:30 P.M.

Location: **The Learning Center, USD 261**
