WORKSHOP DESCRIPTION:

Prodigy is a free online math program that addresses math standards from 1st-8th grade. During this workshop, participants will create a free online Prodigy account, and learn how to set up classes so that Prodigy can be implemented in the classroom, immediately. The first part of the day, participants will be introduced to Prodigy, and will get to experience it through the eyes of the student. Then, we will dive into setting up a teacher account, and we will walk through how to set up individual classes or groups of students. We will also look at the many different features of Prodigy, including how to set up and manage assignments, and how to access reports to monitor student usage and progress. During the afternoon, you will be given work time to develop your classes and/or groups and explore some of the features of the program. We will also discuss how Prodigy can be utilized for individualized instruction and/or progress monitoring. Participants will need to bring laptops and class/caseload lists (if available).

PRESENTER: Karla Jeardoe

Karla Jeardoe has worked for USD 261, teaching gifted students (K-5), for the past fifteen years. She has a Bachelor of Arts in Elementary Education and Interrelated Special Education from Bethany College, and received her Master's of Education in Special Education from Wichita State University. Karla has always had a passion for challenging students and encouraging them to think critically and creatively. She enjoys teaching students to think "outside the box."
